Inhalt

Welcome 17

Organizing Committees 18

Scientific Program 19

Lecture Abstracts

Keynote Lecture:

Jaenisch, **Rudolf**: Nuclear Cloning, Embryonic Stem Cells and Cell Therapy: Promise, Problems, Reality 29

Introductory Guest Lecture:

McKay, **Ronald**: Stem Cells and Regenerative Medicine 31

SESSION 1

Stem Cells and Pluripotency

Wu, Guangming, Gentile, Luca, Do, Jeong Tae, Fuchikami, Takuya, Abe, Kuniya, and **Schöler**, **Hans R.**: Consequences of Failure to Restrict Pluripotency in Mouse Preimplantation Embryos 32

Lemischka, **Ihor**: Exploring Cell Fate Regulation in Stem Cells 34

Orkin, **Stuart H.**, Wang, Jianlong, Rao, Sridhar, Chu, Jianlin, Shen, Xiaohua, and Theunissen, Thorold W.: An Interactome for Pluripotency of Embryonic Stem Cells 35

SPP Member Short Reports:

Quiroga-Negreira, Angel, and **Besser**, **Daniel**: Molecular Mechanisms Involved in the Maintenance of the Undifferentiated State in Human Embryonic Stem Cells 36

Greber, Boris, Babaie, Yasmin, Herwig, Ralf, Brink, Thore C., Wruck, Wasco, Groth, Detlef, Lehrach, Hans, Burdon, Tom, and **Adjaye**, **James**: RNAi-mediated Suppression of OCT4 Function in Human ES Cells Recapitulates Primary Differentiation in the Blastocyst 38

SESSION 2

Stem Cell Biology

Potten, **Chris**: Stem Cells in the Intestine, Numbers, Location and Characteristics 39

Blau, **Helen**: Epigenetic Reprogramming in Non-dividing Somatic Cell Heterokaryons 40

Barde, **Yves-Alain**: Using Embryonic Stem Cells to Study Neural Development 41

SPP Member Short Reports:

Egger-Adam, Diane, Gryzik, Tanja, and **Wodarz**, **Andreas**: Functional Analysis of Binding Partners of Bazooka/PAR-3 during Asymmetric Division of Neural Stem Cells in *Drosophila* 43

Huttner, **Wieland B.**: The Cell Biology of Neurogenesis 44

Corbeil, **Denis**: The Stem Cell Marker Prominin-1 (CD133) – A New Tool for Tissue Engineering 45

Spanholtz, Jan, Levetzow, Gregor von, Caddedu, Ron-Patrick, Beckmann, Julia, Scheitza, Sebastian, Wernet, Peter, Punzel, Michael, and **Giebel**, **Bernd**: NUMB, a Cell Fate Determinant Known from *Drosophila melanogaster*, Inhibits Maintenance of Primitive Human Hematopoietic Cell Fates 47

SESSION 3

Embryonic Stem Cells and Differentiation

Pedersen, **Roger**: Mechanisms of Pluripotency and Epigenesis in Human Embryonic Stem Cells 48

Boheler, **Kenneth R.**: Identification of a Novel Transcription Factor Implicated in the Maintenance and Differentiation of Pluripotent Embryonic Stem Cells 49

SPP Member Short Reports:

Brüstle, **Oliver**, Ladewig, Julia, Driehaus, Johanna, Opitz, Thoralf, Couillard-Despres, Sebastien, Biegler, Andrea, Steinfarz, Barbara, Aigner, Ludwig, Itskowitz-Eldor, Josef, and Koch, Philipp: Derivation of Stable Neural Stem Cells from Human ES Cells 50

Wobus, **Anna M.**: ES Cell Generation of Insulin-producing Cells and Characterization of Potential Pancreatic Progenitors 51

SESSION 4

Embryonic Stem Cells and Differentiation (continued)

Soria, **Bernat**: Cell Therapy of Diabetes mellitus: Insulin Secreting Cells from Stem Cells 53

Field, **Loren J.**: Cardiac Repair 54

SPP Member Short Reports:

Schrickel, Jan Wilko, Röll, Wilhelm, Becher, Ulrich, Hashemi, Toktam, Breitbach, Martin, Sasse, Philipp, Welz, Armin, Lewalter, Thorsten, and **Fleischmann**, **Bernd**: Cellular Cardiomyoplasty Alters Ventricular Vulnerability after Myocardial Infarction 55

David, Robert, and **Franz**, **Wolfgang-Michael:** Enrichment and Isolation of *In vitro* Differentiated ES Cell Derived Cardiomyocytes and Cardiac Precursor Cells for Transplantation into the Infarcted Myocardium 56

Saric, **Tomo**: Immunologic Properties of Undifferentiated and Differentiated Murine ES Cells 58

Special Lecture

Dick, **John E.**: Cancer Stem Cells: Lessons from Leukemia 59

SESSION 5

Adult Stem Cells and Functional Properties

Fuchs, **Elaine**: Stem Cells and their Lineages in Skin 60

SPP Member Short Reports:

Müller, **Albrecht M.**, and Vallabhapurapu, Duttu: Transient HDAC-Inhibitor Treatment Increases Hematopoietic Progenitor/Stem Cell Activities 61

Cross, **Michael**, and Alt, Rüdiger: Hematopoietic Stem Cell Metabolism 62

Zenke, **Martin**, Hieronymus, Thomas, Ensenat-Waser, Roberto, Jaenti, Piritta, Ju, Xin-Sheng, Ober-Bloebaum, Julia, and Sere, Kristin: Stem Cell Commitment and Differentiation in Hematopoiesis 63

SESSION 6

Adult Stem Cells and Functional Properties (continued)

Alison, **Malcolm R.**, Direkze, Natalie, Brittan, Mairi, and Wright, Nick: The Role of the Bone Marrow in Fibrogenesis and Vasculogenesis 65

SPP Member Short Reports:

Braun, **Thomas**: Mechanisms of Myocardial Regeneration 67

Koyanagi, Masamichi, Bushoven, Philipp, Iwasaki, Masayoshi, Aicher, Alexandra, Zeiher, Andreas M., Haendeler, Judith, and **Dimmeler**, **Stefanie**: Regulation of Endothelial Progenitor Cells Differentiation by Wnt-dependent Signaling 68

Schroeder, Timm, Schwanbeck, Ralf, Meier-Stiegen, Franziska, Henning, Konstanze, Erfurth, Marie-Luise, Heering, Johanna, Rieber, Nikolaus, Kohlhof, Hella, Nishikawa, Satomi, Bornkamm, Georg W., Nishikawa, Shin-Ichi, and **Just**, **Ursula**: Molecular Mechanisms of Lineage Decisions Mediated by Notch Signaling in Adult and Embryonic Hematopoietic Development 69

SESSION 7

Neural Stem Cells

Frisén, **Jonas**: Neural Stem Cells and Neurogenesis in the Adult Brain 70

Alvarez-Buylla, **Arturo**: Regulation of Adult Neural Stem Cells: Role of PDGF Receptors 71

SPP Member Short Reports:

Buffo, Annalisa, Rite, Inmaculada, Mori, Tetsuji, Dimou, Leda, Lepier, Alexandra, and **Götz**, **Magdalena**: Glia Cells Generate Neurons: Molecular Mechanisms of Neurogenesis 72

Kempermann, **Gerd**: Gene Networks in the Control of Adult Hippocampal Neurogenesis 74

SESSION 8

Neural Stem Cells and their Niches

SPP Member Short Reports:

Mazurov, Vladimir, Mchedlishvili, Levan, Echeverri, Karen, Schnapp, Esther, and **Tanaka**, **Elly M.**: The Neural Progenitor Cells for Spinal Cord Regeneration 75

Taylor, **Verdon**, and Basak, Onur: Jagged1 Provides a Niche Signal for the Maintenance of Notch1-dependent Adult Neural Stem Cells in the Subventricular Zone 76

Binder, Ellen, Tsarovina, Nina, Stanke, Matthias, and **Rohrer**, **Hermann**: Peripheral Neural Stem Cells: Response to Fate Determining Transcription Factors and Extrinsic Signals 78

Plate, **Karl H.**: Common Regulatory Mechanisms of Angiogenesis and Neurogenesis 80

Moritz, Sören, Lehmann, Stefanie, Faissner, Andreas, and **Holst**, **Alexander von**: Understanding the Neural Stem Cell Niche: An Induction Gene Trap Approach 81

Ber, Suzan, Mansouri, Ahmed, Hao, Wenlin, Englert, Ulrike, and **Neumann**, **Harald**: Characterization of Adult Bone Marrow Derived Stem Cells and CNS Therapy Approach 83

Special Lecture

Oakley, Erin, Liang, Ying, and **Van Zant**, **Gary**: Hematopoietic Stem Cell Changes in Response to Aging 85

SESSION 10

Germ Cells

Engel, **Wolfgang**: Spermatogonial Stem Cells from Adult Mouse Testis Are Pluripotent 86

Kanatsu-Shinohara, Mito, and **Shinohara**, **Takashi**: Culture and Genetic Modification of Mouse Male Germline Stem Cells 87

SPP Member Short Reports:

Hiiragi, **Takashi**: Mechanism of First Polarity Establishment in the Mouse Embryo 88

Jessberger, **Rolf**: Towards Understanding Meiosis: New Stem Cell-based Approaches 90

SESSION 11

Stem Cells in Tissue Engineering and Biotechnology

Caplan, **Arnold I.**: New Tools and Logics for Cell-based Therapies Using Adult Mesenchymal Stem Cells 91

Bang, **Anne**: From Human ES Cells to Islet: Differentiation of hESC Derived Pancreatic Endocrine Cells Mimics *In vivo* Development 92

Peerani, Raheem, Purpura, Kelly, Kumacheva, Eugenia, and **Zandstra**, **Peter**: Engineering the Embryonic Stem Cell Niche 93

Poster Abstracts (alphabetical order)

100 **Anton**, **Roman**, and Kühl, Michael: Wnt/β-catenin Signaling Supports Stemness in Murine Embryonic Stem Cells 97

101 **Basak**, **Onur**, and Taylor, Verdon: HES5 Mediated NOTCH1 Activity Marks Neural Stem Cells and/or Radial Glia during Embryonic Development 98

102 **Becher**, **Marc U.**, Sasse, Philipp, Breitbach, Martin, Garbe, Stefan, Fürst, Dieter O., and Fleischmann, Bernd K.: The Effect of Irradiation on the Subsequent Growth of Satellite Cells *In vitro* 99

103 **Blyszczuk**, **Przemyslaw**, Kania, Gabriela, Valaperti, Alan, and Eriksson, Urs: Liver Resident $CD45^{+}/CD11b^{+}$ Stem/Progenitor Cells Reveal Multilineage and Immunosuppressive Properties 100

104 **Boltze**, **Johannes**, Gille, Uwe, Wagner, Daniel, Schmidt, Uwe, Waldmin, Daniela, Förschler, Annette, Egger, Dietmar, Schwarz, Johannes, Schwarz, Sigrid, and Emmrich, Frank: Experimental Cell Therapy of Stroke in Small and Large Animals 101

105 **Bonilla**, **Sonia**, Hall, Anita, Attardo, Alessio, Huttner, Wieland B., and Arenas, Ernest: Lineage Tracing of Dopaminergic Neurons in the Developing Ventral Midbrain 103

106 **Braun**, **Jan Matthias**, Brulport, Marc, Bauer, Alexander, Hengstler, Jan, Bussmann, Bianka, Ahnert, Peter, Heinrich, Michael, Faber, Sonya, and Emmrich, Frank: Successful Induction of Immunological Tolerance of an Allogeneic and Xenogeneic Cell Therapy Model in Fully Immunocompetent C57BL6 Mice 104

107 **Breitbach**, **Martin**, Hashemi, Toktam, Roell, Wilhelm, Xia, Ying, Dewald, Oliver, Nygren, Jens M., Fries, Jochen W. U., Bohlen, Heribert, Jacobsen, Sten E. W., Hescheler, Juergen, Welz, Armin, Bloch, Wilhelm, and Fleischmann, Bernd K.: MSCs Lack Tissue-restricted Differentiation after Transplantation into the Infarcted Heart 105

108 **Buhl**, **Sandra**, Peitz, Michael, Edenhofer, Frank, and Schorle, Hubert: The Requirement of AP-2γ for Trophoblast Stem Cell Determination, Maintenance and Differentiation 106

109 **Bühnemann**, **Claudia**, Bernreuther, Christian, Dihné, Marcel, Braun, Holger, Malik, Christoph Y., Scholz, Andreas, Schachner, Melitta, and Reymann, Klaus G.: Survival and Differentiation into Neurons of Transplanted ES Cell-derived Precursors within Stroke Lesion 107

110 Cappello, Silvia, **Schmid**, **Marie-Theres**, and Götz, Magdalena: The Role of Adherens Junctions and their Signaling Complexes in the Maintenance of Neural Stem Cells 108

111 **De Pietri Tonelli**, **Davide**, Calegari, Federico, Fei, Ji-Feng, Nomura, Tadashi, Osumi, Noriko, Heisenberg, Carl-Philipp, and Huttner, Wieland B.: Single-cell Detection of microRNAs in Developing Vertebrate Embryos after Acute Administration of a Dual Fluorescence Reporter/Sensor Plasmid 109

112 **Dietrich**, **Jens-Erik**, and Hiiragi, Takashi: Stochastic Patterning in the Early Mouse Embryo 110

113 Dörr, Wolfgang, Gabriel, Peggy, **Kuschel**, **Margret**, Pickert, Andrea, and Siegemund, Annett: Mobilization of Bone Marrow Stem Cells Modulates Oral Mucositis (Mouse) during Fractionated Irradiation 111

114 **Ensenat-Waser**, **Roberto**, Ruau, David, Hacker, Christine, Schmittwolf, Carolin, Rolletschek, Alexandra, Hieronymus, Thomas, Wobus, Anna M., Müller, Albrecht M., and Zenke, Martin: Epigenetic Modification of Neurosphere Cells Induces Embryonic and Hematopoietic Stem Cell Genes 112

115 **Ertürk**, **Dilek**, Pfeifer, Alexander, Mori, Tetsuji, and Götz, Magdalena: Smad4 Is Required for Progression of Adult Neural Stem Cells towards Neurogenesis 113

116 **Falk**, **Anna**, Frisén, Jonas, and Zupicich, Joel: Rapid High-throughput Screen for Genes Directing Embryonic Stem Cell Lineage Choice 114

117 **Finkensieper**, **Andreas**, Hannig, Madeleine, Gräbner, Rolf, Habenicht, Andreas, Sauer, Heinrich, and Wartenberg, Maria: Potential Role of the 5-Lipoxygenase (5-LO) Pathway in Mouse Embryonic Stem Cell (ESC)-derived Embryoid Body (EB) Differentiation and Angiogenesis 115

118 **Flick**, **Burkhard**, Scholz, Patrick, and Klug, Stephan: Identification of Supplements to Replace Serum in the Culture Medium for the Differentiation of Embryonic Stem Cells (ESC) into Cardiomyocytes 116

119 **Ganz**, **Julia**, Kaslin, Jan, Grandel, Heiner, Kroehne, Volker, Wenzel, Isabell, and Brand, Michael: Adult Neurogenesis in the Zebrafish Brain 117

120 **Giselbrecht**, **Stefan**, Truckenmüller, Roman, Weibezahn, Karl-Friedrich, Welle, Alexander, and Gottwald, Eric: SMART-processed Scaffolds for Stem Cell-based Tissue Engineering 118

121 **Glauche**, **Ingmar**, Lorenz, Ronny, Loeffler, Markus, and Roeder, Ingo: Quantitative Lineage Specification: Mathematical Modeling and Biological Implications 120

122 **Gocza**, **Elen**, Catunda Lemos, Ana Paula, Hiripi, Laszlo, Bodrogi, Lilla, and Bosze, Zsuzsanna: Characterization of Rabbit Embryonic Stem Cell Like Cells 121

123 **Gottwald**, **Eric**, Zimmer, Gerald, and Weibezahn, Karl-Friedrich: Perfused Multi-well-type Bioreactors for the Organotypic Culture of Cells 122

124 **Grandel**, **Heiner**, Wenzel, Isabell, Lohs, Claudia, and Brand, Michael: Proliferating Neural Stem Cells in the Vagal Lobe of Juvenile Zebrafish 124

125 **Guan**, **Kaomei**, Wagner, Stefan, Maier, Lars S., Nayernia, Karim, Engel, Wolfgang, and Hasenfuss, Gerd P.: Spermatogonial Stem Cells Differentiate into Cardiovascular Lineages and Generate Functional Cardiomyocytes 125

126 **Hannig**, **Madeleine**, Ruhe, Carola, Vigants, Armands, Finkensieper, Andreas, and Wartenberg, Maria: Leukocyte Differentiation in Murine Embryoid Bodies as *In vitro* Model for Cellular Defence 126

127 **Hareng**, **Lars**, Stummann, Tina, Pelizzer, Cristian, Hartung, Thomas, and Bremer, Susanne: Integration of Embryonic Stem Cell Based Tests into a Testing Strategy for Developmental Toxicity Testing 127

128 **Heine**, **Peer**, Bumsted O'Brien, Keely, Engelkamp, Dieter, and Schulte, Dorothea: A Role for the TALE-homeodomain Transcription Factor Meis2 in Embryonic and Adult Neurogenesis 128

129 **Hirsch**, **Cordula**, Campano, Louise M., Wöhrle, Simon, and Hecht, Andreas: Canonical Wnt Signaling Enhances Neurogenesis from Neonatal Neural Progenitors by Stimulating Proliferation of Committed Precursor Cells 129

130 **Horn**, **Matthias**, Loeffler, Markus, and Roeder, Ingo: Mathematical Modeling of Imatinib Treatment in Patients Suffering from Chronic Myeloid Leukemia 130

131 **Jawerka**, **Melanie**, Zimmermann, Stephan, Göttlicher, Martin, Wurst, Wolfgang, and Götz, Magdalena: The Role of Histone Deacetylase 2 in Neural Stem Cells 131

132 **Kania**, **Gabriela**, Blyszczuk, Przemyslaw, Valaperti, Alan, Heberer, Michael, and Eriksson, Urs: Signaling Dependent Differentiation of Heart-derived Immunosuppressive, Multilineage Stem/Progenitor Cells 132

133 **Kaslin**, **Jan**, Grandel, Heiner, Ganz, Julia, Kroehne, Volker, Wenzel, Isabell, and Brand, Michael: Neural Stem Cells and Neurogenesis in the Adult Zebrafish Brain: Origin, Proliferation Dynamics, Migration and Cell Fate 133

134 **Keil**, **Marlen**, Wulf, Annika, Eckert, Klaus, Uckert, Wolfgang, and Fichtner, Iduna: Comparison of Gene Transfection Methods in Cord Blood Derived $CD34^+$ Stem Cells for *In vivo* Imaging 134

135 **Keller**, **Catharina**, Koch, Philipp, Hack, Michael, Götz, Magdalena, and Brüstle, Oliver: Pax6-mediated Neuronal Specification in Embryonic Stem Cell Cultures 135

136 **Kesseler**, **Daniela**, and Edenhofer, Frank: Conditional Loss of BMPRIA Indicates Essential Roles for BMP in ES Cell Self-renewal and Early Neural Commitment 136

137 **Khattak**, **Shahryar**, Richter, Tobias, Sobkow, Lidia, Herklotz, Stephan, and Tanaka, Elly M.: Transgenesis as a Tool to Study Cell Lineages during Axolotl Regeneration 137

138 **Kim**, **Soya**, Moussian, Bernard, Luschnig, Stefan, and Wodarz, Andreas: Analysis of New Mutant Alleles of Atypical Protein Kinase C in *Drosophila* Neural Stem Cells 138

139 **Klempin**, **Friederike**, Babu, Harish, and Kempermann, Gerd: Serotonin Receptor Stimulation Differentially Regulates Adult Hippocampal Neurogenesis 139

140 **Knapp**, **Dunja**, Epperlein, Hans H., Habermann, Bianca, and Tanaka, Elly M.: Molecular Analysis of Amphibian Regeneration 140

141 **Koch**, **Carmen**, Egger-Adam, Diane, and Wodarz, Andreas: Analysis of a New Interaction Partner of the Bazooka Protein in *Drosophila* Neurogenesis 141

142 **Koch**, **Philipp**, Ladewig, Julia, Biegler, Andrea, Opitz, Thoralf, Driehaus, Johanna, Steinbeck, Julius, and Brüstle, Oliver: Fate Restriction and Plasticity of Human ES Cell-derived Neural Stem Cells 142

143 **Koch**, **Sina**, Ryser, Martin, Bornhäuser, Martin, Ehninger, Gerhard, and Thiede, Christian: Differences in the Localization of Receptor Tyrosine Kinase FLT3 in Human Hematopoietic Stem and Progenitor Cells and Leukemic Blasts 143

144 König, Susanne, **Bohrmann**, **Johannes**, and Sippel, Albrecht E.: Regulation of Myelopoesis in an *In vitro* System Based on Mouse Embryonic Stem Cells .. 144

145 **Kramer**, **Jan**, Steinhoff, Jürgen, Fricke, Lutz, and Rohwedel, Jürgen: Modulation of ES Cell-derived Nephrogenesis 145

146 **Kroehne**, **Volker**, Kaslin, Jan, Ganz, Julia, Grandel, Heiner, and Brand, Michael: Proliferation and Cell Fates during Regeneration of the Adult Zebrafish Brain 146

147 **Kurth**, **Ina**, Franke, Katja, Pompe, Tilo, Bornhäuser, Martin, and Werner, Carsten: Mimicking the Niche – Adhesion of Hematopoietic Stem Cells onto Extracellular Matrix Coatings 147

148 **Kuschel**, **Margret**, Siegemund, Annett, Noack, Ruth, Gabriel, Peggy, and Dörr, Wolfgang: Transplantation of Bone Marrow Ameliorates Oral Mucositis (Mouse) after Fractionated Radiotherapy 148

149 **Ladhoff**, **Juliane**, Bader, Michael, Doebis, Cornelia, Schmitt-Knosalla, Isabela, Reiser, Jakob, Volk, Hans-Dieter, and Seifert, Martina: Immunogenicity of Rat Stem Cells and their Endothelial Derivatives 149

150 **Lepperdinger**, **Günter**, Fehrer, Christine, Laschober, Gehrhard T., and Brunauer, Regina: Mesenchymal Stem Cell Aging 151

151 **Lie**, **Dieter Chichung**, Colamarino, Sophia A., Song, Hongjun, Mira, Helena, Consiglio, Antonella, Jessberger, Sebastian, and Gage, Fred H.: Wnt Signaling in Adult Hippocampal Neurogenesis 152

152 Manns, Martina, Bichler, Zoe, and **Heumann**, **Rolf**: Ras-mediated Downregulation of Adult Hippocampal Neurogenesis in Male synRas Mice Is Attenuated in Females 153

153 **Mazurov**, **Vladimir**: Reconstitution of Fully Functional Spinal Cord of Axolotl with Neural Stem Cells 154

154 **Mohseni**, **Paria**, Smukler, Simon, Schroeder, Insa, Rolletschek, Alexandra, van der Kooy, Derek, Wobus, Anna M., and Nagy, Andras: Role of Nestin in Early Steps of Differentiation 155

155 **Narkilahti**, **Susanna**, Huttunen, Tuomas, Rajala, Kristiina, Pihlajamäki, Harri, Suuronen, Riitta, Hovatta, Outi, and Skottman, Heli: Continuous Monitoring System for Human Embryonic Stem Cells Derived Neuronal Cells 156

156 **Nikam**, **Vandana**, Ahlbrecht, Katrin, Weissmann, Norbert, Koenig, Peter, Lohmeyer, Jürgen, Seeger, Werner, and Voswinckel, Robert: Characterization of Circulating Fibrocytes from the Human and Murine Circulation 157

157 **Nikolova**, **Teodora**, Wu, Minyao, Brumbarov, Krassimir, Alt, Rüdiger, Opitz, Heike, Boheler, Kenneth R., Cross, Michael, and Wobus, Anna M.: WNT-conditioned Media Differentially Affect the Proliferation and Differentiation of Cord Blood-derived $CD133^+$ Cells *In vitro* 158

158 **Nolden**, **Lars**, Edenhofer, Frank, Haupt, Simone, Koch, Philipp, Wunderlich, Thomas, Siemen, Henrike, and Brüstle, Oliver: Cre Protein Transduction: A Tool for Site-specific Recombination in Human Embryonic Stem Cells and their Neural Progeny 159

159 **Overall**, **Rupert**, Jessberger, Sebastian, and Kempermann, Gerd: Involvement of Cdk5 in the Functional Maturation of Adult Mouse Hippocampal Neural Stem Cells 160

160 Peitz, Michael, Münst, Bernhard, Winnemöller, Dirk, Bosnali, Manal, and **Edenhofer**, **Frank**: Stem Cells under Remote Control – Modulating Cellular Functions by Protein Transduction 161

161 **Peter**, **Roland**, Behensky, Christian, Halbwirth, Florian, Landertinger, Elisabeth, and Schürmann, Wolfgang: Stem Cells in Flatworms: Isolation, Characterization and Cultivation of Neoblasts from Planarians 162

162 **Pruszak**, **Jan**, Sonntag, Kai-Christian, van Arensbergen, Joris, Yoshizaki, Takahito, Aung, Moe Hein, Sanchez-Pernaute, Rosario, and Isacson, Ole: Flow Cytometric Analysis and Purification of Neural and Neuronal Cell Populations Derived from Human Embryonic Stem Cells 163

163 **Rieger**, **Michael A.**, Hermann, Andrea C., and Schroeder, Timm: Long-term Time-lapse Imaging: Tracking of Adult Hematopoietic Stem Cells at the Single Cell Level 164

164 **Rodriguez**, **Gerardo Ramirez**, and Kempermann, Gerd: The Small Heat Shock Protein b8 (Hspb8) Participates in the Neural Progenitor Cell Division 165

165 **Rolletschek**, **Alexandra**, **Wiese**, **Cornelia**, Kania, Gabriela, Navarrete-Santos, Anne, Anisimov, Sergey V., Steinfarz, Barbara, Tarasov, Kirill V., Brugh, Sheryl A., Zahanich, Ihor, Rüschenschmidt, Christiane, Blyszczuk, Przemyslaw, Heubach, Jürgen F., Ravens, Ursula, St-Onge, Luc, Braun, Thomas, Brüstle, Oliver, Boheler, Kenneth R., and Wobus, Anna M.: Signals from Embryonic Fibroblasts Induce Adult Intestinal Epithelial Cells to form Nestin-positive Cells with Proliferation and Multilineage Differentiation Capacity *In vitro* 166

166 **Rosowski**, **Mark**, **Tschirschmann**, **Miriam**, Falb, Melanie, and Lauster, Roland: Mesenchymal Condensation in Alginate Hollow Spheres 168

167 **Salchert**, **Katrin**, Grimmer, Mila, Kurth, Ina, Drichel, Juliane, Pompe, Tilo, Bornhäuser, Martin, and Werner, Carsten: Fibrillar Collagen Matrices to Maintain Haematopoietic Progenitor Cells in Culture 170

168 **Sauerzweig**, **Steven**, Günther-Kern, Anja, Reymann, Klaus G., and Braun, Holger: Generation of Neurospheres from Adult Rat Bone Marrow Stem Cells 171

169 Schmelter, Maike, Wartenberg, Maria, and **Sauer**, **Heinrich:** Stimulation of Cardiovascular Differentiation of Embryonic Stem Cells by Mechanical Strain 173

170 **Schmidt**, **Anke**, Scheibe, Johanna, Stoll, Anja, and Pützer, Brigitte M.: Adult Neural Stem Cell Specific Peptides Allow Targeted Adenovirus Vector-mediated Gene Transfer: New Prospects for Direct In Brain-Cell Therapy 174

171 **Schneider**, **Marlon R.**, Adler, Heiko, Braun, Joachim, Kienzle, Beate, Wolf, Eckhard, and Kolb, Hans-Jochem: Canine Blastocyst-derived Stem Cells Can be Induced to Differentiate towards the Hematopoietic Lineage 175

172 **Schreglmann**, **Nina**, Kleber, Susanne, Letellier, Elisabeth, Klussmann, Stefan, Wiestler, Benedikt, Krammer, Peter H., and Martin-Villalba, Ana: Resistance of Neural Stem/Progenitor Cells to CD95L-induced Apoptosis 177

173 **Schroeder**, **Insa S.**, Rolletschek, Alexandra, Schulz, Herbert, Huebner, Norbert, and Wobus, Anna M.: Analysis of Pancreatic Differentiation of Embryonic Stem Cells by Transcriptional Profiling, Real Time RT-PCR, and Immunocytochemistry 178

174 **Schröter**, **Aileen**, and Thallmair, Michaela: Influence of Inflammation on the Behavior of Adult Spinal Cord Progenitor Cells after Spinal Cord Injury 179

175 **Schwarz**, **Florian**, David, Robert, and Franz, Wolfgang-Michael: Promoter Assisted Labeling and MACS-purification of Cardiac Progenitor Cells from Embryonic Stem Cells 180

176 **Sel**, **Saadettin**, Schilling, Martin, Friebel, Katrin, Ehrich, Dirk, Simm, Andreas, Nakhai, Hassan, Kalinski, Thomas, Hoppe, Carsten, Duncker, Gernot I. W., and Paulsen, Friedrich: Application of $CD34^{+}$ Stem Cells and Bone Marrow Cells Promotes the Healing of Corneal Ulcers 182

177 **Stary**, **Martina**, and Weitzer, Georg: Paracrine Promotion of Early Cardiomyogenesis by Parietal Endoderm Secreted SPARC and S100A4 183

178 **Straube**, **Werner L.**, Weissert, Philipp M., Drechsel, David N., and Tanaka, Elly M.: Purification of a Serum Factor that Triggers Cell Cycle Re-entry of Differentiated Multinucleated Newt Myotubes 184

179 **Thum**, **Thomas**, Fraccarollo, Daniela, Schultheiss, Maximilian, Froese, Sabrina, Galuppo, Paolo, Frantz, Stefan, Ertl, Georg, and Bauersachs, Johann: Endothelial Nitric Oxide Synthase Uncoupling Results in Impaired Endothelial Progenitor Cell Mobilization and Function in Diabetes 185

180 **Tiedemann**, **Juliane**, Kasper, Grit, Tuischer, Jens, Matziolis, Georg, Perka, Carsten and Duda, Georg N.: Mechanically Regulated MMPs Might Influence Mesenchymal Stem Cell Behavior 186
