Science7 Dialogue Forum 2022

In January 2022, Germany took over the Presidency of the Group of Seven leading industrial states (G7). The annual meeting of the heads of state and government will take place from 26 to 28 June 2022 at Schloss Elmau.

Under the leadership of the German National Academy of Sciences Leopoldina, the science academies of the G7 countries, convening in the Science7 format, have developed evidence-based statements related to topics on the summit agenda. Thematic priorities include antiviral drugs for pandemic preparedness, global health challenges posed by zoonoses and antimicrobial resistance, the impact of climate change on polar regions and ocean, and concrete measures for decarbonisation.

At the Science7 Dialogue Forum on 31 May 2022, the joint recommendations will be presented and discussed with national and international experts and the public. Moreover, the Science7 Statements 2022 will be handed over to the German G7 Presidency.

Simultaneous translation to German will be provided.

The **Leopoldina** is a classical scholarly society and has 1,600 members from almost all branches of science. In 2008, the Leopoldina was appointed as the German National Academy of Sciences and, in this capacity, was invested with two major objectives: representing the German scientific community internationally, and providing policymakers and the public with science-based advice.

Admission only with admission ticket in combination with valid photo ID. Admission starts at 09:00 am.
